Welcome

'Art of Private Shaking' Glass & Bar Supply GmbH was established 1989 and count more than 100 pairs of helpful hands in our companies around Europe in the meantime.

January 2004 our first subsidiary in Amsterdam, The Netherlands, was settled, 2007 our second in Warsaw, Poland and 2009 in Prague, Czech Republic, 2010 APS Stuttgart, 2014 in Brugge, Belgium, 2015 Paris, France and 2016 Mallorca, Spain.

Due to our sources around the world we guarantee best value prices. We do many MTO "made to order" items such as custom bar mats, stirrers, imprinted straws, vinyl and s/s shakers, holders for napkins, special pourers, ice buckets and other bar items.

We love the challenge to satisfy B2B customer's requirements.

We distribute all our products all over Europe through alliance partners in Sweden, France, Switzerland, Spain and the UK in the same way as we do with our own subsidiaries. This Alliance group helps to compare notes of the customer needs around Europe.

Within 30 years we have gained experience and knowledge by travelling, sourcing and communicating with suppliers and customers.

This is one strong part of our today's professional competence.

Safedge® Rim Guarantee

For over 70 years, Libbey's proven commitment to quality has been backed by our well-known guarantee, "a glass if the rim of a Safedge glass chips." If the rim of any glass covered by the safedge guarantee chips, Libbey will replace or refund the price of the glass when it is returned to the dealer/distributor from whom it was originally purchased. Of course, this guarantee does not cover breakage.

Finedge®

Finedge glassware features a minimum bead and is available on a variety of tumblers and stemware. This finely rimmed glass-ware brings subtle beauty to any establishment.

Safedge® Rim and Foot Guarantee

If the rim or foot of any one-piece stemware item chips, Libbey guarantees to replace or refund the price of the glass when it is returned to the dealer/distributor from whom it was originally purchased.

This guarantee covers such lines as Embassy, Embassy Royale, Lexington, Catalina, Teardrop, Perception, etc. This guarantee does not cover breakage.

Heat-Treated Glassware

Libbey's heat-treated tumblers and stemware are created through a special heating and rapid cooling process after the glass is formed. This secondary process on the "blown" glassware is performed only on the upper portion of the glass where most abuse occurs.

Libbey's heat-treated glassware offers increased resistance to thermal and mechanical shock and is recommended for fast service cycle operations.

Sheer Rim/D.T.E.®

Libbey's Sheer Rim/D.T.E. (Dura Temp Edge) stemware and tumblers feature a beadless edge which is first cracked-off then polished to produce a fine, yet durable edge. This creates a combination of elegance and affordability in glassware for operators looking to upgrade their beverage service, while still maintaining longer service life. Sheer Rim/D.T.E. Tumblers and Stemware are guaranteed against chipping of the Rim.

DuraTuff®

The Libbey DuraTuff treatment is a special thermal afterprocess for „pressed“ tumblers and stemware such as Gibraltar, Inverness, Everest, Paneled Tumbler, Dakota and Endeavour. The DuraTuff process is performed only on the upper portion of pressed tumblers and stemware to increase their resistance to thermal and mechanical shock. Libbey's DuraTuff process produces durable glassware with prolonged service life for the foodservice industry. Look for the DuraTuff name embossed on all Libbey DuraTuff products.

STRAWS / STIRRERS

Biodegradable Straws

HOW DOES IT COMPARE TO A NORMAL STRAW?

Same characteristics and strength of a normal drinking straw. Comes in a variety of sizes, regular, jumbo, cocktail and individually wrapped.

HOW DOES IT BREAK DOWN?

After it's useful life the oxo-biodegradable additive takes effect and the product begins to break down in the presence of oxygen.

WHAT WILL IT BECOME?

The product eventually becomes carbon dioxide, water and biomass without leaving fragments in the environment.

WHAT STANDARDS DOES IT MEET?

- ASTM D6954-04(2013) American standard for exposing and testing plastics that degrade in the environment by a combination of oxidation and biodegradation. This covers:
 - Tier 1 - Degradability
 - Tier 2 - Biodegradation
 - Tier 3 - Eco-toxicity
- Regulation (EC) No. 2023/2006 approvals for plastic coming into contact with food.

THE LIFE CYCLE OF OUR ECO-STRAW

1. Oxo-biodegradable additive "Reverte (BD93470)" is added at the manufacturing stage and extruded at the factory into our ECO-STRAW.
2. The product behaves like any other during its intended service life. The shelf life of our product (un-opened) maintained at 20°C is 18 months from the manufactured date.
3. The useful life (dwell time) of our product is approximately 2-4 months once the product has been opened.
4. After its useful life the oxo-biodegradable additive takes effect and the product begins to degrade in the presence of oxygen. After 4 months of opening, the product will begin to show signs of the photo-initiation process, and then a rapid breakdown of properties resulting in acute embrittlement after a further 3-6 months.
5. The product will end up in a landfill environment where the biodegradation will take over and eventually the product becomes carbon-dioxide, water and biomass.

Get the right portion of ice every time with the Revolution™ portion system.

- Revolution™ Portion System - For maximum accuracy, this unique ice portioning system counts the number of times the agitator passes the shaver blade. Sanitize glassware thoroughly with just one simple touch. If you ever wondered why the cocktails served in the most trend setting bars tend to taste so much better, the answer may lie not in the contents of the glass but within the glass itself. A glass that has been perfectly cleaned, sanitized, and chilled, helps keep drinks colder for longer, removes unpleasant residual odours and enhances the flavour of drinks.

CO2 bolle is not included.

Print on Vinyl
Barblades with vinyl coating
are perfect as a gift for
promo-tional business.

We are able to print logos which **look like they are laser engraved**. This special printing technique is done by silk screen process. Different colours are also available and much less in price compared to high price laser engraving. We print on stainless steel with pad- and silk screen machines. Due to a special pre-treatment long lasting prints are possible even on highly polished surfaces like shakers. Multi-coloured logos are also possible. A permanent logo is achieved by laser engraving on stainless steel products. We can also polish after laser application for a more subtle appearance of your logo – ask your sales person for details.

i

Print on Wood

Print, laser marking and hot stamping is available for wooden products.

i

Print on Vinyl Shakers

Cocktail Shakers with vinyl coating are perfect for promotions. Not only are these shakers very popular due to their grip and insulation effect, prints in multi colour are possible with good visibility.

Vinyl Colours
From orders above 300pcs.
we produce every PANTONE
COLOUR for you.

We print on our regular bottle pourers –

on the spout, collar or wherever it's possible. Custom-moulded pourers can be developed for all kinds of markets. Tell us about your needs.

1 Colour

Every Pantone Colour is possible.

3 Colours

Silver and gold are also possible.

Special shapes and positions

No matter if the glass has a handle, is curved or V-shaped or the customer wants an unusual printing position like on the base or vertically; we will find a way.

2 Colours

90% of all our customers have 2-colour printings.

4 Colours

Silver and gold are also possible.

Outlet & Brand Logo

We produce your glasses with your brand logo, store them and add an outlet logo upon order and ship it individually to the customer in time.

Front & Rear

Small quantities for shows and events.

Satin Etch

Looks like engraved or etched. As a very popular trend continues, we keep track of our customer's wishes. „Less is often more“. Instead of printing multi coloured logos with too much details, we print a special colour named satin etch. This subtle colour can range from solid white to nearly transparent. This look gives the glass an elegant attitude.

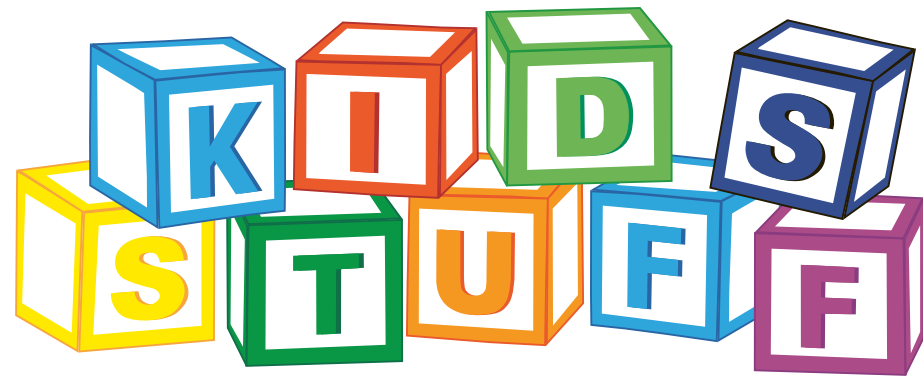

Irregular Printing Positions

We can reuse the same printing plates for different glasses. You define one size and you can get a series of different glasses with the logo at different positions. By repeat orders or orders with different products, we can provide small qntys even if the printing position is uncommon or irregular.

Capacity Lines

We have a licence to print capacity lines with CE approval.
